**Cosmology And Large Scale Structure In The Universe**

Cosmologists are currently researching the theory of large-scale structures, which are in essence groups of neighbouring galaxies. Recent "galaxy-hunts" have resulted in data for hundreds of ...

This is an interesting time for cosmology since it seems that our theories for the large scale structure of the Universe are being seriously challenged by the growing amount of data. The goal of these lectures is to introduce and explain the current debate on this issue. By its very nature the

**The Large Scale Structure of the Universe - B.J.T. Jones**

Abstract: Galaxies are not uniformly distributed in space. On large scales the Universe displays coherent structure, with galaxies residing in groups and clusters on scales of  $\sim 1-3$  Mpc/h, which lie at the intersections of long filaments of galaxies that are  $>10$  Mpc/h in length.

### **Large Scale Structure of the Universe - Gettysburg College**

In this thesis, several theoretical concepts relating to the large-scale structure of the universe are presented. In particular, various aspects of the hierarchical scenario are investigated. The initial perturbation field and its early evolution are discussed in Chapter 3. Chapter 4 is concerned with two-point correlation functions for galaxies, clusters and super-clusters. In Chapter 5, some ...

Opinions on the large-scale structure of the early universe range widely from primeval chaos to a well-ordered mass distribution. P.J.E. Peebles argues that the evolution proceeded from a nearly uniform initial state to a progressively more irregular and clumpy universe.
