The diffusion equation gives us a mathematical description of zombie movement. By solving it, we produce the function  $Z(x, t)$ , the density of the zombies at each position  $x$  for all time  $t \geq 0$ .

### **Mathematical Modelling of Zombies - University of Oxford**

We can use words, drawings or sketches, physical models, computer programs, or mathematical formulas. In other words, the modeling activity can be done in several languages, often simultaneously. Since we are particularly interested in using the language of mathematics to make models, 3
