The Basic Principle of Phase-Transfer Catalysis, Some

Cancer immune evasion is a major stumbling block in designing effective anticancer therapeutic strategies. Although considerable progress has been made in understanding how cancers evade destructive immunity, measures to counteract tumor escape have not kept pace.

Immune evasion in cancer: Mechanistic basis and

Epratuzumab is a B-cell-directed non-depleting monoclonal antibody that targets CD22. It is currently being evaluated in two phase 3 clinical trials in patients with systemic lupus erythematosus (SLE), a disease associated with abnormalities in B-cell function and activation.

The mechanistic impact of CD22 engagement with epratuzumab

Artificial life (often abbreviated ALife or A-Life) is a field of study wherein researchers examine systems related to natural life, its processes, and its evolution, through the use of simulations with computer models, robotics, and biochemistry. The discipline was named by Christopher Langton, an American theoretical biologist, in 1986. There ...

Artificial life - Wikipedia

A quinolone antibiotic is any member of a large group of broad-spectrum bactericides that share a bicyclic core structure related to the compound 4-quinolone. They are used in human and veterinary medicine to treat bacterial infections, as well as in animal husbandry.

Welcome to the first national meeting of the Swedish Chemical Society! The meeting brings together more than 450 persons from all directions of chemistry represented within the society and offers a program of top plenary lectures, exciting specialized parallel sessions and plenty of room for interactions with meeting participants and exhibitors ...

in Lund, 17-20 June 2018 - 1st National Meeting of the

Environmental Science: Nano is a comprehensive source of information on nanomaterial interactions with biological and environmental systems, and the design and use of engineered nanomaterials for sustainability. Developing nanotechnology sustainably requires fundamental understanding of how

Environmental Science: Nano - Royal Society of Chemistry

The aim of Aging Cell is to publish the highest quality, innovative research addressing fundamental issues in the biology of aging. Aging Cell seeks to cover all areas of geroscience, highlighting research that uncovers mechanistic aspects of the aging process, as well as the links between aging and age-related disease.

Anions are intimately related to sustainable modern societies. Using synthetic receptors to monitor and manipulate ion concentrations provides the means to support power production, environmental remediation, and clean water supplies.
